

## Electrical Part for Forklifts

Forklift Electrical Parts - Lift trucks together with various lift trucks could have specific labels used in some hazardous locations. The mark denotes that this particular model of lift truck meets the minimum standards of ANSI/UL 553 meant for electric lift trucks or ANSI/UL 558 used for internal combustion engine lift trucks.

Applications for marked lift trucks may be found in National Fire Protection Association NFPA 505 - Powered Industrial forklifts including: Type Designations, Areas of Use, and Maintenance and Operation. Check with your local insurance provider and Fire Marshall for additional information on the approved uses of industrial powered forklifts in your application.

If the specific lift truck meets the outlined standards, labels could be put. A labeled lift truck will show the type of designation located on the nameplate and will have a correctly corresponding label placed.
