

## Doosan Forklift Parts

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international and intercontinental corporation which includes Defense Industry Products, Industrial Vehicles, Diesel Engines, Automation Systems, Machine Tools and Construction Equipment.

In the United States, Doosan Infracore America Corporation is headquartered in Suwanee, Georgia. It is home to a 170,000 square foot production facility, which is the home of the Compact Equipment and Construction department. West Caldwell, New Jersey is home to the Machine Tool division and Cleveland, Ohio is home to the Forklift division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction consumer needs.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. Also, there are more than 90 independent sellers moving lift truck materials and materials handling equipment. This network helps Doosan Infracore America to aggressively compete in this competitive market. The lift truck product line impressively features 63 distinctive versions consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these various vehicle versions vary from 3,000 to 33,000 lbs. All trucks are built in an ISO 9001 certified facility.

Doosan Infracore America is the fastest growing forklift business in the North American market, thanks to their consistency in maintaining a high level of client service excellence and optimum product performance to all Doosan Infracore Lift Truck users. The U.S. lift Truck division situated in Cleveland has a professional team experienced in Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's original domestic forklift market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. began to import assembled forklifts as part of a national equipment expansion project. Initial sales of this industrial equipment focused on large business communities, the armed forces and on state-run firms. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division began trade operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck production plant was successfully completed. Continuous technical training became the new focus for improving quality and product development.

Daewoo started the first domestic lift truck business in 1967, and quickly gained a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's advanced technological enhancements combined with sales success placed them in a position of substantial expansion of their forklift operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative venture project to respond to competitive pressures in the US materials handling industry. This project drastically expanded Daewoo's lift truck sales. Construction was completed in 1984 to facilitate a modern plant which helped launch the company for the fabrication of high added-value goods suited for export. In 1993, the corporation had a international sales network and started exporting models they had developed through in-house expertise, as a sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into international markets.
