

Aerial Work Platforms

Aerial Work Platforms - There are numerous attachments designed for lift trucks that could be used in order to help expand the capabilities of your lift truck and allow you to lift things, handle materials with out difficulty or to finish clean-up tasks.

Several attachments were particularly designed for the blades themselves. For example, fork extensions could be utilized when you need much more blade length, which increases lifting capability. Fork extensions come in lengths ranging from forty eight to one hundred twenty inches. Triangular or rounded attachments are another variety used when moving rolled material to be able to make sure it does not roll off of the traditional flat blades.

Lifting attachments can be pivoting and telescoping crane accessories. They are available in numerous kinds. These attachments are usually designed for transporting metal bars, poles, lumber or any kind of bulky items. Additional attachments like other kinds of hook plates and hooks are available so as to carry items using a chain or sling. Magnetic lifters and slab lifters are other items that can be used along with hook accessories. Slab lifters are specialized attachments which are utilized for carrying various materials that are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools which attach to your lift truck so as to make transporting rolls of carpet easier. The accessory connects onto the lift truck's forks and has a pole that goes through the middle of the carpet roll.

There are numerous various kinds of lift truck attachments that could be meant for facility maintenance like for example snow forks. These forks connect to front end loaders and can transfer materials such as dirt, soil and snow. Other common cleanup attachments comprise standard sweepers and magnetic sweepers. Standard sweepers includes a broom that the lift truck blades hook onto for sweeping large spaces like for instance warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths as much as sixty inches and this surface area makes clean up fast and easy.

A material spreader is another lift truck accessory which is normally utilized at facilities. These spreaders are useful for various applications like spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Another optional lifting attachment are work platforms. These could be used by lots of different businesses on a daily basis. Platforms may vary in size from 36" x 36" to up to 60" x 60". A few units may be available and are capable of folding up and storing into a smaller place. Work platforms are designed to raise staff up to an overhead location with the use of the forklift. Larger platform units have extra space for staff in order to bring tools and other necessary items intended for the job. Normally work platforms are constructed of steel or ploy material.
