

JLG Forklift Part

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove set out on a cross country RV trip. After spending numerous years establishing his family built crane business with his brother, John had no idea that this trip would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road trip.

All through their trip, John reacquainted himself with previous business associates along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered an infinite market for a product that could quickly and safely lift people in the air to accomplish maintenance and other building functions.

After returning from their holiday, John set up a business with two of his friends and obtained a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates some of the simple design elements of that original lift into existing models.

JLG forklifts have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. At present, the business proudly continues to expand itself into a range of markets globally and develops new products to ensure clients are capable of being more effective and perform in the workplace within a safer atmosphere.
